A bestselling modern classic—both poignant and funny—about a boy with autism who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's The Great American Read Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable story of Christopher's quest to investigate the

The 13 ideas in this book were identified by a group of national leaders as the most significant ideas impacting the contemporary community college. The book is designed for trustees, administrators, faculty, policy makers, legislators, and community leaders who want to be better informed about the issues affecting our students and our nation.

In October 1985, at age twenty-seven, Danny Meyer, with a good idea and scant experience, opened what would become one of New York City's most revered restaurants—Union Square Cafe. Little more than twenty years later, Danny is the CEO of one of the world's most dynamic restaurant organizations,

which includes eleven unique dining establishments, each at the top of its game. How has he done it? How has he consistently beaten the odds and set the competitive bar in one of the toughest trades around? In this landmark book, Danny shares the lessons he's learned while developing the winning recipe for doing the business he calls "enlightened hospitality." This innovative philosophy emphasizes putting the power of hospitality to work in a new and counterintuitive way: The first and most important application of hospitality is to the people who work for you, and then, in descending order of priority, to the guests, the community, the suppliers, and the investors. This way of prioritizing stands the more traditional business models on their heads, but Danny considers it the foundation of every success that he and his restaurants have achieved. Some of

Danny's other insights: Hospitality is present when something happens for you. It is absent when something happens to you. These two simple concepts—for and to—express it all. Context, context, context, trumps the outdated location, location, location. Shared ownership develops when guests talk about a restaurant as if it's theirs. That sense of affiliation builds trust and invariably leads to repeat business. Err on the side of generosity: You get more by first giving more. Wherever your center lies, know it, name it, believe in it. When you cede your core values to someone else, it's time to quit. Full of behind-the-scenes history on the creation of Danny's most famous restaurants and the anecdotes, advice, and lessons he has accumulated on his long and ecstatic journey to the top of the American restaurant scene, *Setting the Table* is a treasure trove

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with

other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can realize the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

An Army leader is able and willing to act decisively, within superior leaders' intent and purpose, and in the organization's best interests. Army leaders recognize that organizations, built on mutual trust and confidence, accomplish missions. Every member of the Army, military or civilian, is part of a team and functions in the role of leader and subordinate. Being a good subordinate is part of being an effective leader.
