- API: Certain mods that define their own item aspects have been accidentally doing so in the 'wrong' place. To prevent this I will now wipe all item aspects registration that occurs before TC defines the core item aspects. - API: Additionally I have added an event mods can subscribe to that would be the correct place to define item aspects.

The minimum value of this function is 0 which is achieved when $\{x_i\}=1$. Note that the Rosenbrock function and its derivatives are included in `scipy.optimize`. The implementations shown in the following sections provide examples of how to define an objective function as well as its jacobian and hessian functions.
