An automatic transmission can be quite costly to repair, which is why there are so many transmission additives on the market today. One of the most popular brands is Lucas Transmission Fix, and if you've ever had transmission problems, you've probably heard of it. It claims to fix transmission slipping, hard shifting, transmission leaks, and stalling.

The normal transmission fluid required for this transmission is 6.8 quarts. Another feature of this transmission is the cooling ports that allow for transmission oil coolers to be used. The 4L80E transmission was introduced in 1991 and remained in production until 2013. The 22 years of usage is a testament to its robustness and strength.

Honestly, empty (and on a fresh rebuild, but "5.4L Triton blows up" is not a new story), the SuperDuty goes pretty well even with the 5.4, if you're willing to put your foot down a bit. The U-Haul went \*much better than expected\* with the 6.8, and I can't believe it wouldn't be impressive in the F250/F350.
