What you're left with is clean air which will flow at high speed to make sure you have a clean and shiny car. The MasterBlaster 8 horsepower motor ensures high-speed airflow. The two twin turbine engines enable this blower to blast off the air at 58,500 feet per minute velocity.

Best Blower for Drying Car 2022 - Top 10 Picks

Normally, air is drawn from the area right next to the engine, which, of course, is very hot because the engine heats up everything under the hood and all around it. Cooler air carries more oxygen, so if you can help your car somehow reach air that hasn't been heated by the engine, that extra oxygen makes a bigger bang from the same amount of fuel.

Keeping it clean is vital for good engine health. Depending on your car and what kind of oil you're using, you may need to change both the oil & oil filter as much as every 3 months or 3000 miles. Many newer vehicles' owners' manuals will recommend changing your oil less frequently - often in-between 5,000 and 10,000 miles.
