Cloud application development is also fueled by Big Data. Without Big Data, there would be far fewer cloud-based applications, since there wouldn't be any real necessity for them. Remember, Big Data is often collected by cloud-based applications, as well! In short, Cloud Computing services largely exist because of Big Data. Likewise, the only reason that we collect Big Data is because we have services that are capable of taking it in and deciphering it, often in a matter of seconds.
