Using masking tape is often overlooked, but can save the car paint around your window frame. Applying duct tape directly on your car will likely chip the paint and leave a residue, so you don't want to do that. Cover the window frame with a layer of masking tape, about two inches wide. You can then safely apply duct tape on top of it.

A simple connection from the car battery to the leisure battery in the caravan achieves this, but there are problems with this type of connection. If the car battery is flat and you try to start the car, a heavy current will be drawn from the caravan's leisure battery and would cause the caravan wiring to over heat and possibly cause a fire.
