Hi, Your responses have been really useful. And greatly appreciate your help. So based on all of this would mean... I have a 192.168.0.0/24. Im right in thinking I can get a maximum of 254 networks from this as the prefix is /16.

## **What is Subnetting? - NetworkLessons.com**

In the case of your example topology, Router2 and Router3 can only route through Router5. This would not change whether the routing domain had 3 networks or 300,000 networks. In other words, Router2 and Router3 would not benefit from knowledge of specific routing information since the next-hop for all destinations is the same.
