Creative thinking is the ability to consider something in a new way. Creative thinking includes analysis, open-mindedness, problem-solving, organization, and communication. Many employers value creative thinkers, so consider highlighting your creative thinking skills on your resume and in interviews.

communication model is based on the fact that different people are influenced by different kinds of communication. Some are deeply affected by emotion, while others are more susceptible to logical reasoning, and a third group may need a fair amount of objective information in order to make their own judgment.
