Dynamic Forces In Capitalist Development

According to Marx, the forces at work in a capitalist economic system bring about the increase in the rate of exploitation of labour. The basic force at work is the competition among the capitalists to the increase in the rate of surplus value what Marx called rate of exploitation and thereby enlarge their profits share relative to wages share.

Marx's Theory of Capitalist Development | Economics

Capitalism is an economic system based on the private ownership and control of the means of production and their operation for profit. Central characteristics of capitalism include capital accumulation, competitive markets, a price system determined by supply and demand, private property, property rights recognition, voluntary exchange, and wage labor. In a capitalist market economy, decision ...

State capitalism is an economic system in which the state undertakes business and commercial (i.e. for-profit) economic activity and where the means of production are nationalized as state-owned enterprises (including the processes of capital accumulation, centralized management and wage labor).The definition can also include the state dominance of corporatized government agencies (agencies ...

State capitalism - Wikipedia

The lagging performances of some of the economies in Figure 1.11 demonstrate that the existence of capitalist institutions is not enough, in itself, to create a dynamic economy—that is, an economy bringing sustained growth in living standards. Two sets of conditions contribute to the dynamism of the capitalist economic system.

Uneven Development. Processes of uneven development, according to Smith, are the result of a dialectic of spatial differentiation and equalization that is central to the logic of capitalism, transforming the complex mosaic of landscapes inherited from pre-capitalist systems. From: International Encyclopedia of Human Geography, 2009. Related terms:
