Temp Sensor

Location

A coolant temperature sensor is located at the engine block's front.

Although the location may vary in cars that feature pulleys on their sides, the coolant temperature sensor is typically located in the pulley system of the car.

coolant temperature switch, is the engine management system that monitors the

temperature of the coolant and relays this information to the ECM.

When the sensor is functioning properly, it will tell your on board computer if the temperature is too high, alerting the driver that a problem exists by illuminating a warning light on the dashboard.
