Critical thinking is at the core of most intellectual activity that involves students learning to recognise or develop an argument, use evidence in support of that argument, draw reasoned conclusions, and use information to solve problems.

Critical and Creative Thinking | The Australian Curriculum

In logic and philosophy, an argument is a series of statements, called the premises, intended to determine the degree of truth of another statement, the conclusion. The logical form of an argument in a natural language can be represented in a symbolic formal language, and independently of natural language formally defined "arguments" can be made in math and computer science.

Argument - Wikipedia

So the critical thinking aspect of our New Profession Map on which it is a focus area, is part of the analytics and creating value section in our core knowledge, and much of the evidence-based practice work also sits in that area and evidence-based practice is about asking good questions and that is a key aspect of critical thinking.
