Evaluation and Treatment of Myopathies - Oxford Medicine

EVALUATION A possible inflammatory myopathy should be considered in any patient presenting with progres-sive weakness. The most important part of the evaluation is the history and physical examination, as the pattern of muscle involvement helps distinguish the inflammatory myopathies from other neuromuscular conditions and from each other.

Evaluation and treatment of inflammatory myopathies

Inclusion body myositis is refractory to corticosteroids and to several immunomodulating therapies that have been used. Dermatomyositis and polymyositis are treated with corticosteroids and a variety of agents. Osteoporosis and opportunistic infections pose a significant risk during treatment of patients.
