The way in which quantitative research and qualitative research are conventionally contrasted with each other runs along familiar lines – the former is seen as offering 'hard', 'factual' data, while the latter is depicted as softer, as providing deeper insight, but at the expense of being necessarily more 'interpretivist' and 'subjective' in its approach.

Quantitative and Qualitative Research: Perceptual Foundations

Paleolithic representational art has a number of consistent characteristics: the subjects are almost always animals, depicted without scenic background, usually in profile, and mostly in outline; the means of representation are extremely economical, often consisting of only a few strokes that indicate the salient features of the animal which are sufficient to suggest the whole form; and it is ...
