Access to health care in rural * communities is a challenge.

Approximately 20% of the Canadian population lives in rural areas, yet these areas are served by only 8% of physicians. 1,2 Also, many Canadians travel to rural areas on holidays and need access to nearby health care services in case of emergency. It is difficult to recruit physicians to rural practices given the advantages of urban

Recruiting physicians to practise in rural communities ...

“Clinical practice guidelines are systematically developed statements to assist practitioner and patient decisions about appropriate health care for specific clinical circumstances.”(Institute of Medicine, 1990) Issued by third-party organizations, and not NCCIH, these guidelines define the role of specific diagnostic and treatment modalities in the diagnosis and management of patients.

Clinical Practice Guidelines | NCCIH

Tonelli defines evidence-based medicine as a twofold concept. First, EBM is an optimal method for developing and describing population-based medical evidence—what he calls “a school of medical epistemology”. Secondly, EBM “attempts to describe a clinical practice centered on evidence derived from clinical studies”.
