The first is that a solenoid in your transmission, which is the way that your car's computer mechanically engages gear changes, has become stuck. The other cause is that your car may have activated something called "limp mode" due to faulty sensors. Both of these problems can be corrected by an experienced mechanic at a transmission shop.

## **Is Your Automatic Transmission Stuck In A Certain Gear ...**

Check your transmission fluid. Transmission fluid lubricates the moving parts of your transmission. You should check your fluid every 30,000 to 60,000 miles in a manual transmission car. Failure to do so can cause your transmission fluid to become contaminated with bits of metal from the bearings, synchronizers and gears.
