Maternal Health Task Force

Every mother and newborn child has the right to a positive and safe birthing experience. Maternal health can be promoted by: Developing evidence-based policies and strategies; Improving access to the full range of affordable, equitable and high-quality family planning and reproductive health services to increase the contraceptive use rate and ...

Maternal health in Western Pacific - World Health Organization

Maternal mental health significantly influences Maternal-fetal attachment (MFA), and infant-caregiver bonding begins fairly early in pregnancy. In a recent metaanalysis, 183 studies published between 1981 and 2006 were reviewed to examine predictors of MFA. Perceived social support predicted MFA to a greater extent when compared with other ...

Maternal mental health in pregnancy and child behavior

Maternal death or maternal mortality is defined in slightly different ways by several different health organizations. The World Health Organization (WHO) defines maternal death as the death of a pregnant woman due to complications related to pregnancy, underlying conditions worsened by the pregnancy or management of these conditions. This can occur either while she is pregnant or within six ...
