Elevator 101 Introduction to Elevator Technology

The guide wheels connect the car to the guide rails, and the car is carefully lowered to the bottom of the shaft. The shaft is then roofed over, leaving a machine room above the shaft. The hoist motor, governor, controller, and other equipment are mounted in this room, with the motor located directly over the elevator car pulley.

How elevator is made - used, parts, dimensions, structure ...

In 1852, American Elisha Otis was the man credited with pioneering the first elevator which would prevent it from falling if the hoisting cable snapped or failed. He invented a 'brake' or, 'safety hoist' as he called it, which meant if the cables broke, a wooden frame at the top of the elevator car would break and hit the walls of the ...

How Much Do Home Elevators Cost: The Residential Elevator ...

Traction Elevators are lift systems that use an electric hoisting machine and hoisting cables to raise and lower the elevator car vertically along guide rails. Traction Elevators are a common system for many mid-rise and high-rise structures and require a penthouse machine room and counterweight. Geared Traction Elevators are slower at 500' (152 m) per minute and can travel a maximum of 250 ...
