In 1979, as an outgrowth of the Belmont Report, Beauchamp and Childress published the first edition of their book Principles of Biomedical Ethics, which featured four bioethical principles: autonomy, nonmaleficence, beneficence, and justice.

n I troducon ti to Bioethics and Ethical Decision Making

Because beneficence is a fundamental principle of healthcare ethics, ethical egoism (i.e., the belief that our primary obligation is to ourselves and that selfishness is a virtue) is not logically connected to health care. This is true because the motivation for most people who want to be healthcare professionals is helping people.
