In vitro fertilisation (IVF) is a process of fertilisation where an egg is combined with sperm in vitro ("in glass"). The process involves monitoring and stimulating a woman's ovulatory process, removing an ovum or ova (egg or eggs) from her ovaries and letting sperm fertilise them in a culture medium in a laboratory. After the fertilised egg undergoes embryo culture for 2-6 days, it is ...

As reproductive technologies have become increasingly sophisticated, pressures for women to sell their oocytes or to be paid to bear children for others have mounted. Some liberal theorists urge that if paid sex, paid surrogacy, paid gamete donation, and the like can be achieved voluntarily, these are legitimate forms of economic opportunity.
