Magnetic Field Around a Single Wire with a Current. A particularly useful magnetic field equation to know is the magnetic field at a distance  $a$  from a long straight wire with current  $I$  as shown in the diagram above. This is given by  $B = \frac{\mu_0 I}{2\pi a}$ . Here  $\mu_0$  is called the permeability of free space and is equal to  $4\pi \times 10^{-7} \text{ T}\cdot\text{m/A}$ .
