A number of 1970 year model Tillotson Carburetors were received and installed by HD that had a defective idle mixture needle (27688-66). They had a blunt end instead of the tapered end. Symptoms include an erratic or unstable idle mixture setting requiring frequent adjustments with the needle requiring adjustment over 1-1/8 turns open.

Exhaust The stock predator muffler keeps the engine from 'breathing out' too much air. If you have lots of air coming into the engine, you need to release it with little resistance for added performance. That's when the predator 212cc performance high flow exhaust header really comes into play. You are now able to shove air and fuel quickly into the engine, and release it with little
