The speed of light in vacuum, commonly denoted  $c$ , is a universal physical constant that is important in many areas of physics. Its exact value is defined as 299 792 458 metres per second (approximately 300 000 km/s or 186 000 mi/s). According to the special theory of relativity,  $c$  is the upper limit for the speed at which conventional matter, energy or any signal carrying information can travel ...
